EVIDEN
an atos business

Taking your RISE with SAP journey to the next level

Eviden extends RISE with SAP with new levels of delivery and service

RISE++ with Eviden

RISE++ with Eviden delivers fully cloud-enabled services to accelerate RISE with SAP implementations with the adoption of a mature set of tools, accelerators and services that enables our customers to transform their business to intelligent, sustainable enterprises in the cloud
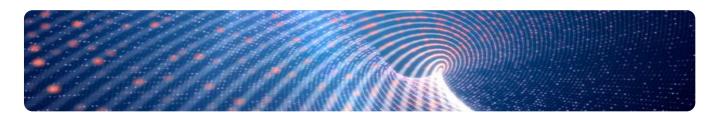

With industry specific content and functions, customers across all sectors benefit from secure and cost-effective S/4HANA transformations under the RISE construct.

The RISE++ offering includes our PRODELAS project delivery tool and best practice methodology, SmartGuide which are optimized to support deployments of RISE with SAP. RISE++ delivers genuine business transformation through the use of industry best practices and our extensive cloud capabilities.

RISE++ with Eviden increases the value our customers gain from RISE with SAP and accelerates their journey to cloud, as its scope goes "Beyond SAP". At Eviden, we believe that our customers need more than just RISE with SAP, and a customer's digital transformation extends Beyond SAP. That's why RISE++ with Eviden extends digital transformation to the entire cloud and non-cloud landscape of our customers with Orchestrated Hybrid Cloud for SAP (OHC4SAP).

Our Transformation Hub within RISE++ combines our industry and business process expertise with multi-cloud architecture services and Digital Cloud ITSM adoption to deliver an affective low-risk transformation journey, thus accelerating a customer's ability to realize the benefits of cloud.

RISE++ with **Eviden**

Although RISE with SAP is a key enabler for business transformation, Eviden believe that IT Service Management also needs to transform in reaction to the new paradigm of IT landscapes. Our Future Fit Service Transformation service completes our customers digitalization journey by linking Business Transformation, shift to cloud and application transformation with ITSM transformation

Working in concert with the Transformation Hub, is the Innovation Hub. A unique digital factory established to design and build innovative solutions for our customers utilising best practice human-centric design philosophies, agile development practices with SAP Business Technology Platform (BTP) at its core. Within RISE++ projects, our SAP digital engineers work closely with customer stakeholders to define, design and deliver extensions and integration components, allowing customers to retain differentiating processes whilst keep their S/4HANA Cloud core clean.

As we know, a "RISE with SAP" project brings key technology capabilities to the fore – digital process discovery, cloud infrastructure, SAP Business Technology Platform, SAP Business Network and SAP S/4HANA Cloud. RISE++ with Eviden takes the benefits of RISE with SAP to the next level by enabling rapid, low-risk SAP S/4HANA migrations.

RISE++ with Eviden

Core to our ability to complete migrations with speed, is the Advaned Preconfigured Solution portfolio – a series of industry specific S/4HANA solutions always based on the latest release and covering all core best practice processes. Fully configured, ready to run. Accelerating the Explore and Realize phases of an S/4HANA transformation project is key to gaining positive buy-in from a customer's business stakeholders and becomes a springboard to success.

RISE++ brings together the best of SAP and Eviden, combining industry leading technology from SAP and the consulting assets from Eviden, including, organisational and business change management, technology and business process assessments, reference architectures and pre-configured solutions, project accelerators & SAP Industry Cloud apps.

The Eviden PRODELAS platform plays an important part of orchestrating the entire customer journey with transparency and accessibility – the platform is used by the customer and Eviden project members.

RISE++ with Eviden provides customers with the additional tools and support services they need to adopt S/4HANA Cloud at lower risk and cost, as well as extend its capabilities with SAP Business Technology Platform and innovate for the future.

With Cloud at the core
RISE++ with Eviden
enables businesses to
transform, innovate and
redesign processes to
reduce complexity and
improve performance
with agility.
