

The Eviden logo is rendered in a white, outlined, sans-serif font. The letters are spaced out, with the 'E' and 'N' having a slightly different structure than standard fonts, giving it a modern, digital feel. The background of the entire page is a dark blue space filled with a field of small, glowing red and white dots, with a large, bright, curved light trail or data stream sweeping across the lower right portion of the image.

EVIDEN

Secure Cloud for Digital Enterprise

Looking to shift your SAP environment into the cloud? We help enterprise-level organizations around the world boost their agility and responsiveness while mitigating the risks, challenges, and concerns associated with SAP on public and hybrid clouds

With Eviden and Cloud provider, you can be confident of not only a smoother transition and optimized operations and insights but that you'll be as safe in the cloud as you have been on-premise.

an atos business

Our unparalleled joint experience with hyperscalers and SAP, tools, innovations, and industry solutions has enabled us to define world-class best practice to be followed in cloud migration and S/4HANA transformation, and the proven methodologies to ensure that it is followed. Our combined methodologies help you accelerate, simplify and de-risk SAP transformation. The benefits of our end-to-end managed service are anchored in the reduced complexity, and the increased flexibility and agility

Utilizing the features of Cloud and S/4HANA for connected enterprises, with service transformation is key for transformation and feature-ready IT setup

Delivering your SAP modernization agenda comes down to the technology and expertise that drives this. If you need guidance in building the case for SAP transformation – guidance from expert partners who have proven success in navigating the digitization and cloud journey, Eviden is the right choice for you.

Cloud is beyond infrastructure and is the way forward

The digitalization of businesses and industries means organizations need to be able to adapt, innovate and respond at speed. Accelerated digitalization and unprecedented levels of disruption are forcing many enterprises to rethink their business models and accelerate their own transformation agendas to compete. Adapting to the scale and pace of change, enterprises must be guided by real-time, accurate visibility and clarity into operational performance and customer behavior. However, enterprises are hampered by legacy systems and infrastructures, unable to manage massive and growing volumes of data or adjust quickly to changing business needs.

SAP S/4HANA enables you to digitalize your business core and accelerate transformation into a data-driven intelligent enterprise. Powered by AI and with advanced analytics, SAP achieves breakthrough outcomes in business models, processes, and innovation.

Moving critical applications like SAP to cloud is one of the most impactful changes an organization can make due to infrastructure modernization, accelerated innovation and business responsiveness. S/4HANA on Cloud is seeing global adoption, supporting expansion, driving benefits in modernizing the platform and mitigating business risk

54%

Of enterprises expect future demand for cloud software will increase* as global organizations seek agility, cost savings, risk reduction, and immediate insights from their ERP solutions.

44%

Of enterprises believe that cloud provides infrastructure modernization to increase performance, security & compliance

60%

Eviden value proposition

Digital Cloud Transformation Hub for SAP is our core value proposition

DCTH for SAP combines all of our leading SAP capabilities, services, toolkits, experience and partnerships. The DCTH helps enterprises effectively upgrade, transform, automate and manage their SAP environments on cloud to quickly realize the full business value of becoming an intelligent enterprise.

- Transform to optimize existing resources and unlock powerful new capabilities.
- Create a solid foundation for cloud and connect to a Cloud-Forward Future
- Innovate with confidence with secured platform and operations in the cloud
- Enable integration and collaboration for best business outputs and optimal user experience

Strong Partner Eco system & Consultingt

35+ years of partnership with SAP, with certification in each area pertaining to hosting and operations

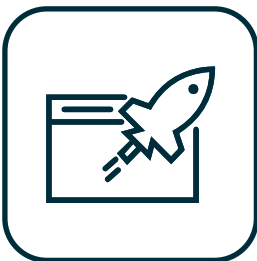

Long and proven relationship with leading hyperscalers and specialized endorsement for migrating and operating SAP workloads on Cloud.
Strong consulting capabilities for technical, application and business transformation
Empowering Cloud native and Secure enterprise jointly for various customers across world
Sustainable solutions for achieving net-zero carbon emission aim

Simplified Migration

High degree of automation in the overall process. Starting with automated discovery. Automation of system build maintenance activity. Our solutions are enabled on each cloud platform.

CO-innovation with hyperscalers and continues enhancement to enable multiple features and optimal utilization of cloud native for feture proof platform transformation

Connected industry solutions

Industry solutions and integration with platforms solutions for business transformation are engineered to elevate the value delivered beyond Cloud for deeper functionality and capability. It enables customers to be better positioned to pursue industry specific digital transformation programs

Secured Cloud Infrastructure

In today's business environment where customer experience is critical, the sovereignty and protection of data is paramount, Eviden in partnership with Hyperscalers embed security, compliance and auditability into the fabric of migrations while accelerating change and ensure this remains at the heart of post-migration operations – securing SAP operations in the cloud.

Specific security solutions for SAP application with Eviden proven expertise and experience in security. Cloud native security. Threat Detection & Response with SAP ETD. SAP Admin Privileged Access Management services. SAP Security Monitoring (with Eviden MDR and Cloud native).

Extended Business Solutions

Service Transformation with extended business solutions with build, expand, empower and safeguard platform features. Process automation and improvements. Business performance management for SAP with auto-reporting and auto-healing. Improved services with technical administration automation

Multiple options to start the Cloud journey:

Explore & Choose Your Right Transformation Journey with Eviden

Wondering about that first step in your transformation journey? We are glad to be of service; Whether it's moving your existing SAP system to the Cloud or upgrading to S/4HANA in parallel, Eviden makes it easy for you to decide the level of engagement needed, with different options for Cloud and S/4HANA.

We have for you

- 1. In-depth capability presentations and workshops with team of experts including hyperscaler team to outline the transformation journey**

- 2. Eviden Comprehensive Cloud Transformation Assessment**

Your ticket to place your business firmly on a path towards a successful cloudification journey.

Through a four-week discovery and analysis process we will dive deep into all critical parameters for cloud transformation to define the key outcomes. During this time, you will also have access to a dedicated specialist consultant to answer any migration related query. Our tailored report will include:

- A summary of your source system assessment, plus a view of a tailored migration approach
- Recommendations for a best-fit solution, including proposed Target Architecture
- High-level project timelines, incorporating a transformation roadmap and recommendations
- An HA-DR strategy
- Summary of your transformation costs and potential funding support from Hyperscalers

- 3. Eviden also offers customized T-shirt size packages (Small Enterprise, Medium Enterprise, Large Enterprise) for SAP Cloud & S/4HANA.**

We understand the challenges and potential of these technologies as we, ourselves, Eviden run on SAP on Azure Cloud. There is no better partner for you on your cloud transformation journey and we can't wait to get started.

Our credentials

Leaders in Cloud migration
(ISG, Nelsonhall)

190+ HANA customers

65+ active engagements

60+ live customers

(6300+ SAP projects)

14000+ SAP experts

8000+ trained & ~5500+
certifications in SAP digital
and cloud solutions

Local presence in 42 countries

5 Global Delivery Centers (India,
Poland, Bulgaria, Romania,
Turkey)

7 Nearshore centers (Canary
Islands, Argentina, China, Egypt,
Thailand, Morocco and Senegal)
