# Eviden BTP Conversion Accelerators

## Keeping the Core Clean

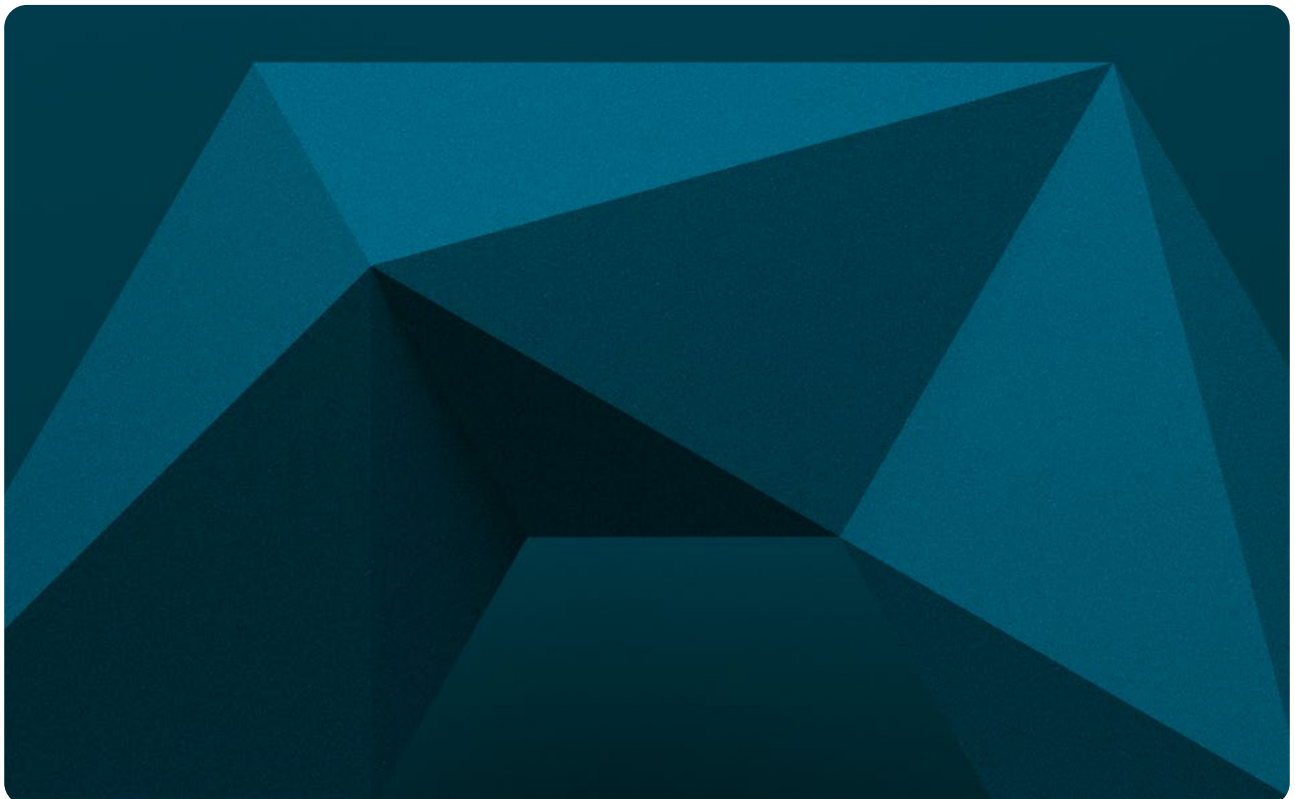

Enabling a culture for Business Model service innovation is integral in building a resilient model. Today most businesses are challenged with ever changing dynamics around market trends that needs to be converted to opportunities or propositions. The propositions elevate to value added services that are examined for further learnings & insights that are derived from the functioning of the ecosystem

- Understanding market trends & disruptions is a key first step when remodeling a business
- Eviden Human-Centric Approach to Business Model Innovation starts with Design Thinking, empathizing with the end user to discover their true needs.
- Combine Design Thinking with Architecture Thinking to create a solution that is experientially desirable, technologically feasible, and financially viable.
- **Emotional Innovation** to break down organizational or cultural barriers
- **Functional Innovation** to embrace intuitive user experiences and new technology
- **Process Innovation** to challenge process norms and adopt new/best practices

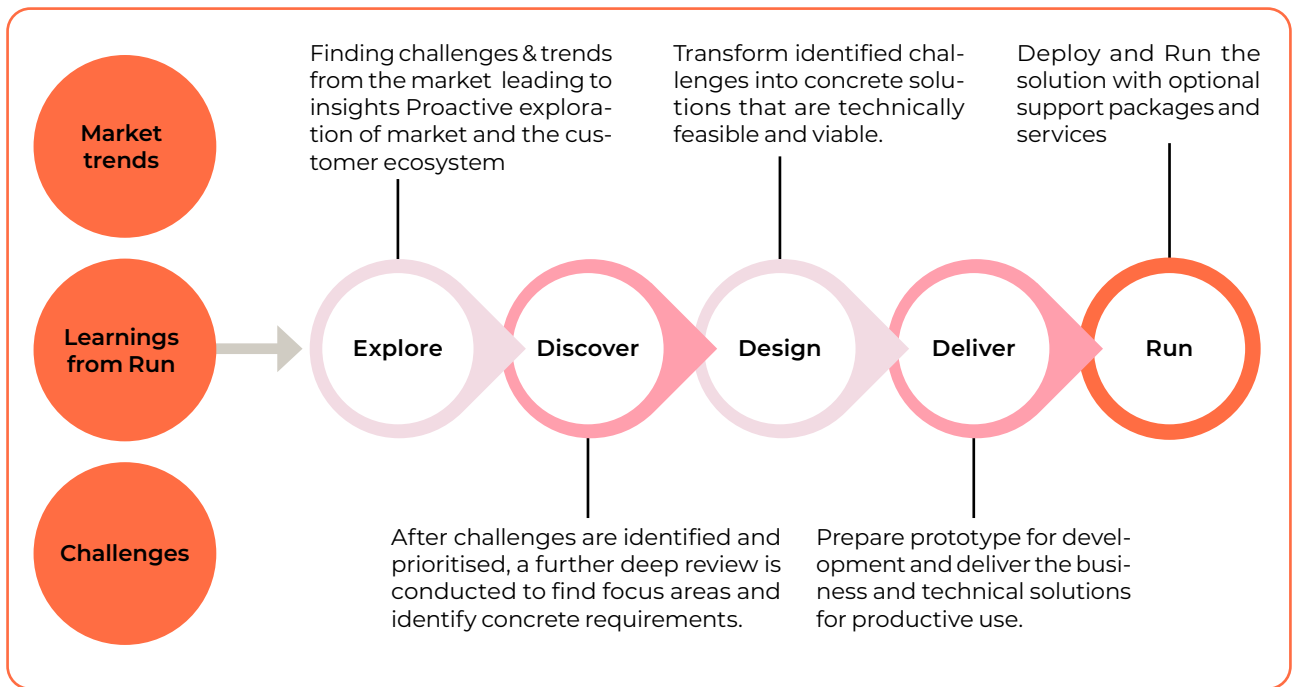

To thrive in dynamic conditions, businesses need to increase their agility and resilience. Eviden's SAP BTP Industry LOB solutions provide business process optimisation leveraging on the key levers on SAP BTP with a strong objective to reduce the cost & time of development, data driven approach interoperability driven by APIs, easy adoption, aligning with compliance and requirements of the industries. The solutions & tools provide a value added, cost effective business model that is resilient for future needs. The cost of transformation & future fit enterprise is further reduced by 30 –40 % with the tools & solutions powered by the BTP kernel.

Eviden's customer Engagement framework embrace a human-centric philosophies in the innovation process to balance the needs of People, Process, and Technology. These come together to enable sustainable innovation model where insights & learnings serve as triggers for further exploration.
