Eviden BRSR: Driving Sustainable Business Growth

Unlock the potential of your business with Eviden BRSR. Our solution is designed to help you meet SEBI's Business Responsibility and Sustainability Reporting (BRSR) requirements while enhancing your company's sustainability and social responsibility.

Introduction

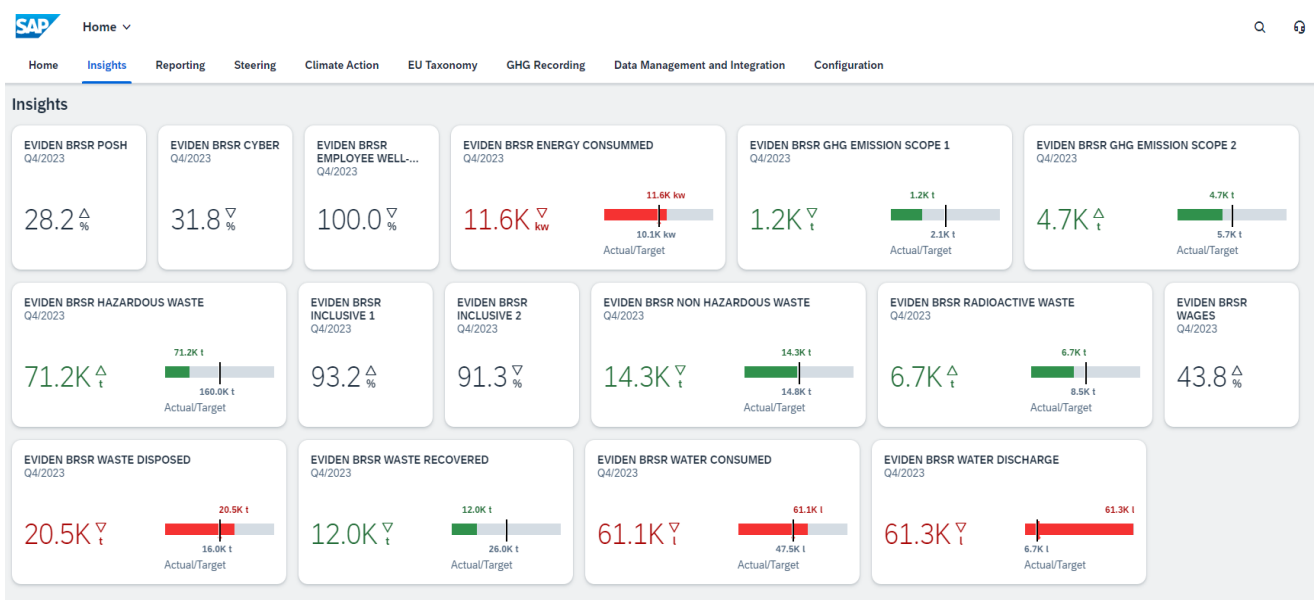

The Business Responsibility and Sustainability Report (BRSR) is a framework established by the Securities and Exchange Board of India (SEBI) aimed at improving corporate transparency with respect to Environmental, Social, and Governance (ESG) practices. Commencing from the 2022-2023 financial year, BRSR requires the leading 1,000 listed companies in India to disclose their ESG initiatives and performance.

The BRSR report outlines an organization's dedication to responsible business practices and sustainable development. It includes governance structures for sustainability, stakeholder engagement, and goals in environmental stewardship, social responsibility, and ethical conduct. By reporting performance metrics and future commitments transparently, the BRSR aims to improve accountability, manage risks, enhance reputation, and drive continuous improvement in global sustainability efforts.

SAP Sustainability Control Tower

The SAP Sustainability Control Tower (SCT) is a robust solution designed to support organizations in managing their sustainability performance. This platform enables the recording, reporting, and proactive management of Environmental, Social, and Governance (ESG) objectives by consolidating data from multiple sources into a unified interface. The SAP Sustainability Control Tower assists organizations in overseeing their sustainability initiatives through effective ESG data management, performance tracking, and compliance reporting.

Accessed through the SAP Fiori launchpad, this all-in-one platform gives a clear and organized overview of all components to users and also allows personalization.

Eviden's BRSR solution – Comprehensive insight and action

Co-Innovated with SAP®

Eviden's BRSR Solution is an add-on to SAP Sustainability Control Tower (SCT). Accessed through SCT it offers detailed and comprehensive insights into a company's environmental, social, and governance (ESG) performance. It is designed to assist companies to effortlessly prepare their Business Responsibility and Sustainability Reports in compliance with regulations. The platform's comprehensive features also allows organizations to assess their impact and pinpoint areas for improvement. Here's a summary of its capabilities:

Eviden's Business Responsibility and Sustainability Reporting (BRSR) Framework

Comprehensive Data Management: The BRSR solution consolidates various raw data input sources, minimizing the need for duplicate data entry by operational teams. It processes the gathered data into precise, standards-compliant emissions records.

Real-Time Calculators and Trackers: The solution offers semi-real-time GHG calculators for Scope 1, 2, and 3 emissions. It maintains an auditable CO2 ledger, and includes water and waste calculators with a broad waste category library.

Configurable Calculators: The platform provides real-time configurable calculators, offering flexibility to select various standards, protocols, periods, and more. This feature enables the accommodation of a wide range of industry-specific requirements.

Data Input Options: The solution offers multiple data input methods, including flat file transfer and semi-real-time dashboard and analytics. This capability ensures that the processed data is promptly reflected on user dashboards.

Regulatory Compliance: Eviden's BRSR solution ensures adherence to SEBI's BRSR guidelines. It fosters trust with stakeholders through transparent reporting and promotes sustainable practices within the organization.

Goal Tracking and Improvement Identification: This platform enables companies to effectively set, monitor, and measure their sustainability goals and initiatives. It assists businesses in identifying areas needing improvement and facilitates targeted interventions to significantly enhance sustainability performance.

In summary, the Eviden BRSR solution provides a structured approach to managing and reporting on sustainability metrics, ensuring compliance, and driving continuous improvement in sustainability practices.

Benefits

Eviden BRSR Solution offers comprehensive reporting tools that make it easy to track and report your environmental, social, and governance (ESG) performance. Our solutions ensure regulatory compliance with SEBI's BRSR guidelines, build trust with stakeholders through transparent reporting, and promote sustainable practices within your organization.

Benefits of Eviden's BRSR Solution

- **Comprehensive Reporting:** Easily track and report your ESG performance.
- **Regulatory Compliance:** Ensure your business meets SEBI's BRSR guidelines.
- **Enhanced Transparency:** Build trust with stakeholders through transparent reporting.
- **Sustainability Focus:** Promote sustainable practices within your organization.

Benefits of alignment with BRSR principles

Investor Relations: Investors increasingly consider ESG factors in their investment decisions. A robust BRSR attracts sustainable investors who prioritize companies with strong environmental, social, and governance practices.

Regulatory Compliance: In many regions, regulatory frameworks mandate that companies disclose environmental, social, and governance (ESG) information. The BRSR ensures compliance with these requirements, thereby avoiding potential legal and reputational risks.

Integration with Business Strategy: The BRSR aligns sustainability goals and initiatives with the company's overall business strategy. It aids leadership in making informed decisions by demonstrating how sustainability contributes to long-term value creation, risk management, and competitive advantage.

Performance Evaluation: By presenting key performance indicators (KPIs), benchmarks, and progress against targets, the BRSR allows executives to evaluate the effectiveness of sustainability initiatives and allocate resources accordingly.

Risk Identification: The BRSR identifies environmental, social, and governance risks that could impact the company's operations, finances, or reputation. It enables proactive risk management strategies to mitigate these risks and enhance resilience.

Reputation Building: Transparent reporting on sustainable practices and achievements enhances the company's reputation among stakeholders. It demonstrates leadership in corporate responsibility, attracting socially conscious investors, customers, and employees.

Continuous Improvement: By reporting on progress and outcomes, the BRSR encourages continuous improvement in sustainability practices. It prompts companies to set ambitious goals, innovate in sustainable technologies and processes, and strive for operational efficiencies.

Internal Communication: The BRSR fosters internal alignment by educating employees about the company's sustainability strategy, goals, and achievements. It reinforces a culture of responsibility and encourages employees to contribute ideas and initiatives.

Why Choose Eviden for your BRSR Solution?

Eviden provides robust, innovative, and recognized ESG reporting solutions that can help organizations achieve their sustainability goals effectively.

Ease of use

Simplified and streamlined tracking and reporting of your ESG metrics

Compliancy

Effortless BRSR-compliant reports, demonstrating your commitment

Deep Expertise

Eviden has over 2 decades experience in implementing ESG solutions

Leader in Sustainability

Recognized leader in Sustainability commitments and services
