**Deliver a modern  
ERP experience with  
Eviden ElevateNow for SAP**

# Modernizing your ERP while safeguarding existing SAP innovations is a huge undertaking.

## Organizations invest heavily in their SAP customizations, making ERP modernization easier said than done

While they are critical to business processes, SAP customizations, or “innovations,” can lead to a cluttered ERP core and create difficulties when modernizing or migrating to cloud-based solutions. Without a way to replicate these highly custom innovations, enterprises that need a resilient digital services platform risk falling behind in a rapidly changing market.

By leveraging ServiceNow’s low-code approach, Eviden ElevateNow for SAP creates a unified system of engagement, ensuring that the system of record remains safe and stable as a clean digital core. Companies can remove manual, time-consuming, and error-prone processes from their existing ERP while modernizing or migrating from a legacy on-premise ERP to a cloud-based solution.

# Realize the power of frictionless migration.

The opportunity for innovation is limitless when starting with a clean core. Powerful features, such as the ERP Customization Mining tool, can help discover, rank, and prioritize key innovations for re-platforming to ServiceNow for easier access and use. With an ever-expanding library of pre-built modules and the opportunity for custom solutions, enhancing the ERP experience is easier with ElevateNow for SAP.

**Achieve operational excellence during your ERP modernization journey while elevating user experiences.**

Provide a clean core and process parity, ensuring that organizations can maintain ERP innovations while migrating to the cloud

Reduce total cost of ownership, optimize processes faster, and enable efficient interoperability to preserve innovations and enhance new customizations.

Shift focus to business value and enhance business processes with ServiceNow while Eviden provides expertise to ensure a smooth migration and modernization process

# Enable accelerated adoption for your enterprise.

Empower end users to be more self-reliant when working with ERP data and accelerate time to value with your modernization journey. With ServiceNow's low-code/no-code App Engine, stakeholders can build enhanced dashboards, create automated workflows, and make better sense of data thanks to more meaningful object names and fields.

**Leverage ServiceNow as the system of engagement for easier operation and faster adoption.**

Increase ERP process innovation with a standard, single platform of engagement to bring added value to stakeholders.

Preserve unique differentiators while accelerating innovation with a streamlined digital core that's end-user friendly

Bring dashboards to the point of decision-making with world-class user experience and workflow automation that drives process efficiency

# Unleash resilient innovation with a modernized ERP experience

Design, deploy, renovate, and decommission parts of your ERP system without the need for extensive go-live processes or risky downtime. With a cloud-based system of engagement, it's easier to apply iterative development strategies and seamlessly deploy new innovations and enhancements as needed.

**Keep your data safe without reducing access with a separated and secure system of record.**

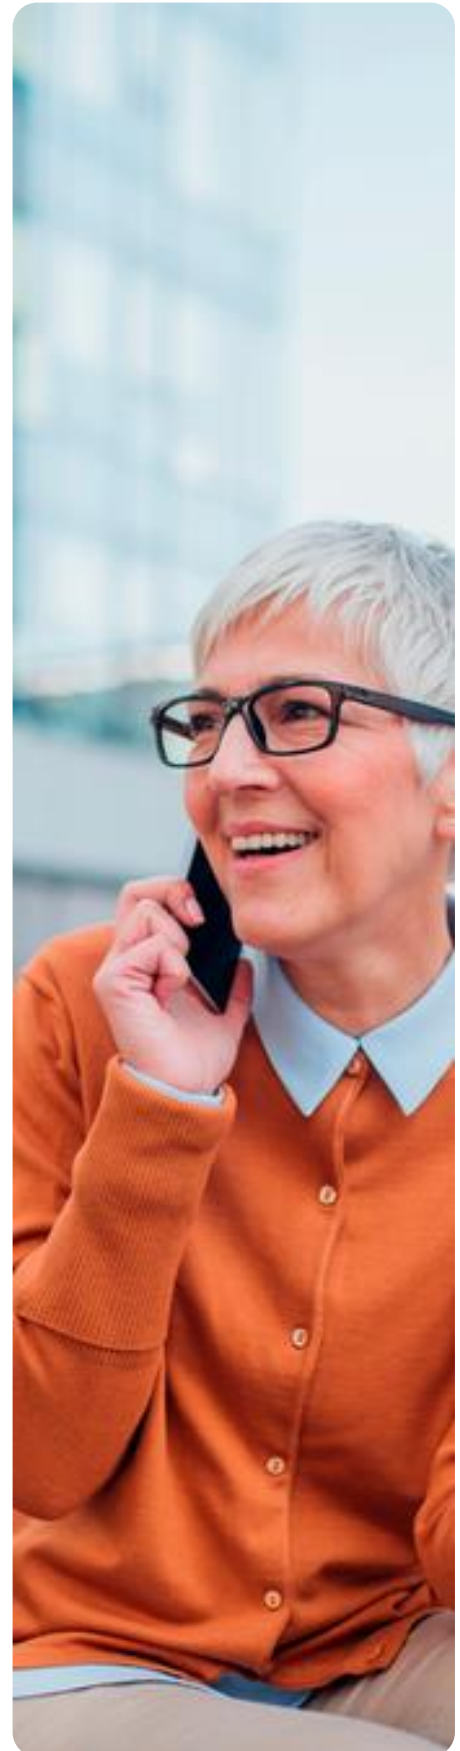

Increase innovation velocity and safeguard existing ERP innovations with a flexible design, deploy, renovate, and decommission process

Minimize the risk of process disruption by leveraging a suite of solutions that combines the power of ServiceNow, SAP, and Application Performance solutions.

Stay competitive and drive innovation with a unified solution to innovation and engagement, creating a sustainable, end-to-end digital services model.

# Make the most of your ERP experience with Eviden ElevateNow for SAP.

ServiceNow and Eviden help businesses on their ERP modernization and migration journey with the power of cloud-based, low-code/no-code solutions
