- **Interfaces/Customización.** Bespoke developments.

Customizable

- Altea allows personalizations and integration to the customer application landscape..

Central repository

- Central repository of information for generation, representatives and retailers.
- Break-down adaptable hierarchy

ALTEA Smart Trading

The solution

Customer Benefits

- Get a complete 360° view of your trading activity
- Improve time to market
- Achieve greater automation for operation and processes
- Reduce your capital expenses and operational costs
- Scale your business with a solution that can evolve as you grow

Key Features

Schedule and trade shorter time intervals: Navigate the shorter trading granularity with a tool fully prepared for 15-minute trading. Use a product that has been specifically designed to optimize all data processing and storage under a quarter of an hour framework.

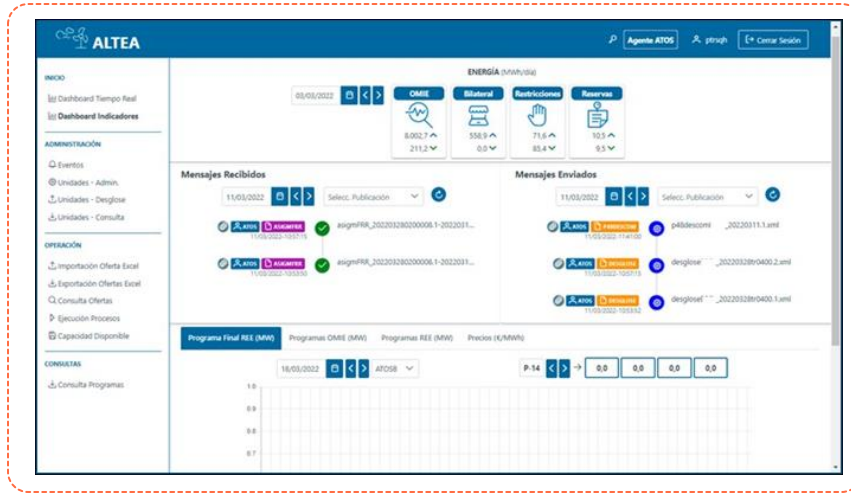

Solution up to the new trading challenges: Energy markets are undergoing nowadays a change in the trading paradigm. The reduction of the trading interval (from 1h periods to 15min/5 min) requires different solutions to trade, higher speed and automation level and greater support from analytics.

Benefit from the latest technology: Trade with a solution based on state-of-the art technologies under a microservices architecture, that will allow you to deploy on cloud and opt for a delivery model either on-premises or SaaS. You will not have to pay for third party software since all components are open-source, compatible with most technologies and your corporate tools.
